General Index of Financial Information (GIFI)

As a corporation, you have to include financial statement information when you file a *T2 Corporation Income Tax Return*. When you use the GIFI, you do not need to submit your financial statements with your return and schedules. The GIFI is an extensive list of financial statement items where each item has a unique code (for example, cash is 1001).

You can find a complete listing of GIFI items and their codes in Appendix A on page 12.

When do you use the GIFI?

Use the GIFI to submit your financial statement information for both paper and Internet filed returns.

For more information about our Internet filing service, visit our Web site at www.cra.gc.ca/corporation-internet.

How do you use the GIFI?

The GIFI is available as part of tax preparation software programs that we certify. It is also included in some utility programs that allow you to import information from an accounting software program to a tax preparation program. If you do not use tax preparation software see "What is the GIFI-Short?" or "What are GIFI schedules?" on this page. After you choose a GIFI code for each item you report on your financial statements, you will send us only the item code and dollar amount when you use our Internet filing service, or when you print a copy and file it as part of your T2 RSI, *Return and Schedule Information*.

What level of detail is required with the GIFI?

The Canada Revenue Agency (CRA) needs the same level of detail with the GIFI as the CRA used to need from traditional financial statements. For example, if your corporation's financial statements include 40 items such as cash, accounts receivable, total assets, sales, cost of sales, income taxes, and net income after taxes, we expect that same number of GIFI codes. There is **no** minimum number of GIFI codes needed for your return to be accepted. We need as many GIFI codes as it takes to represent your corporation's balance sheet and income statement in their entirety.

Note

Do **not** submit the working papers you use to show the accounts or sub-accounts, which make up a financial statement item.

What is the notes checklist?

The notes checklist is a short set of questions designed to determine who prepared the financial statements and the extent of their involvement, and whether they expressed any reservations. It also identifies the type of information contained in the notes to the financial statements. Complete the notes checklist that is included with the GIFI.

What about notes to the financial statements?

Submit any notes to your financial statements with your GIFI information. If you file electronically, you can include the notes in text format with your transmission. If you file a computer-prepared return, include a paper copy of your notes with your T2 RSI.

For more information on the notes checklist and notes to financial statements, see page 7 of this guide.

What is the GIFI-Short?

If you do not use tax preparation software, and have both gross revenue and assets of less than \$3 million each, use the paper version of the GIFI called the GIFI-Short. You can choose from approximately 100 commonly used balance sheet and income statement items. Also included is a separate area of income statement items that can be used by farming corporations.

What are GIFI schedules?

If you do not use tax preparation software and do not fit the criteria for using the GIFI-Short, use the GIFI schedules. The T2SCH100, *Balance Sheet Information*, the T2SCH101, *Opening Balance Sheet Information*, and the T2SCH125, *Income Statement Information*, provide spaces in a column format for you to write in your GIFI field codes and corresponding amounts. The T2SCH141, *Notes Checklist*, is for completing the Notes Checklist.

Where can you get a copy of the GIFI guide with the GIFI list, the GIFI-Short form and guide, and the GIFI schedules?

Get this guide with the list of GIFI items, the GIFI-Short form and guide, and the GIFI schedules from our Web site at www.cra.gc.ca/t2return or by calling 1-800-959-2221.

General Information

Who can use the GIFI?

All corporations – except for insurance corporations – can file using the GIFI.

Insurance corporations

The GIFI does not currently meet the reporting needs of insurance corporations involved in underwriting (life insurers, deposit insurers, or property and casualty insurers). The GIFI does not include items specific to the insurance industry. You should continue to submit a paper copy of your financial statements along with your T2 return and schedules.

Non-resident corporations

You can use the GIFI when you report in unconsolidated, Canadian funds. Do not use the GIFI if you are filing under section 115 of the *Income Tax Act*, only because of section 116, or you are a treaty-based exempt corporation.

Partnerships or joint ventures (also co-ownerships, co-tenancies)

Use the GIFI to report your own financial statement information, but not the financial statement information of partnerships or joint ventures you may be involved in.

For paper filed returns, send financial statement information for a partnership or joint venture, with your return.

For returns filed using the Corporation Internet Filing service, send the financial statement information for a partnership or joint venture to your tax centre. Include a cover letter with your name, Business Number, and your taxation year-end. Identify the financial statements attached as those of partnerships or joint ventures in which you have an investment. Request these statements be included in the file of your corporation.

Inactive corporations

Use the GIFI to file your balance sheet information. You may have an income statement to file. If so, use the GIFI to file this information.

First year after incorporation

You may be filing for the first year after incorporation. If so, complete two balance sheets: an opening and a closing. If you are not using a software package approved by us to complete this information, and you are using the GIFI-Short form, write “opening” in the top right hand corner of the appropriate balance sheet. If you are using the GIFI schedules, the T2SCH100 is for the closing balance sheet information and the T2SCH101 is for the opening balance sheet information.

Deferred expense statements

You may be involved in exploration and development that has not yet generated significant sales revenue, and you

may have capitalized deferred expenditures. If so, you must **not** use the GIFI to itemize these expenditures. You should report the aggregate deferred expenditures as balance sheet information. As well, you have to report “0” in the required fields on your income statement information (see “Validity check items” on this page).

Reporting in Canadian funds

Report your financial statement information in Canadian funds even if you are a Canadian branch of a foreign corporation.

Reporting negative amounts

If you are using a software package, it will show you how to mark items as negative amounts. If you do not use a software package, you should mark negative amounts using brackets () or a minus sign “-”.

Reporting in dollars

Do not report your financial statement amounts in thousands (000s) or millions of dollars. Report the actual dollar amount; do not report cents (for example, report cash of \$10,500.75 as 10501 at line 1001 – cash.)

Reporting unconsolidated financial statement information

Report your financial statement information for each legal entity (unconsolidated). Include all unincorporated branches or divisions within that legal corporate entity.

Reporting multiple lines of business

You may have multiple lines of business. For more information on how to report this type of situation using the GIFI, see Appendix B on page 27.

Using the GIFI

1. Select the items usually reported on your balance sheet from items in the 1000 to 3849 range.
2. Select the items usually reported on your income statement from items in the 8000 to 9970 range.

Note

Items 9370 to 9899 relate specifically to farming income and expenses.

3. Select the items usually reported on your extraordinary items and income taxes from items in the 9975 to 9999 range.

Validity check items

The GIFI information has to balance. We use the following rules to verify the information you provide.

- total assets = total liabilities + total shareholder equity
- total revenue – total expenses = net non-farming income

- total farm revenue – total farm expenses = net farm income

You have to provide certain line items so that we can verify the above equations. Each GIFI **must** include:

balance sheet

Item 2599 – Total assets
 Item 3499 – Total liabilities
 Item 3620 – Total shareholder equity

non-farming income and expenses

Item 8299 – Total revenue
 Item 9368 – Total expenses

and/or

farming income and expenses

Item 9659 – Total farm revenue
 Item 9898 – Total farm expenses

when reporting a breakdown of retained earnings

Item 3849 – Retained earnings/deficit end

extraordinary items and income taxes

Item 9999 – Net income/loss after taxes
 and extraordinary items

The amount of a required item may be NIL. If so, you have to enter "0".

Note

These required fields **do not** represent the minimum number of items that need to be GIFI-coded and filed with the CRA. These are codes that must be included, along with all the other GIFI codes needed to represent a corporation's financial statements.

For an example of how to use the GIFI, see page 8

How to select GIFI items

The GIFI consists of items you find on a balance sheet and income statement. The balance sheet section consists of items pertaining to assets, liabilities, and shareholder equity. Items specific to retained earnings are included in this area as well. The income statement section consists of items you find under revenue, cost of sales, and expenses. Due to the specific reporting needs of the agriculture industry, we have provided a separate section for farming revenue and expenses. A section for extraordinary items and income taxes is listed after the farming section. For a complete listing of GIFI items, see Appendix A on page 12.

We have further divided the GIFI into blocks of items within these sections. The item at the start of each block is highlighted. This item represents the generic term for items within the block. You may not find the item that is an exact, or close match to the item on your financial statements. If so, use the generic item.

Note

The generic item at the start of each block does **not** represent the total of the items in the block.

Assuming that you will prepare the GIFI from your own financial statements, use the following process when you select GIFI items:

- Try to select an exact match from the GIFI to items on your financial statements.

- If you cannot find an exact match, select the most appropriate item.
- If you cannot find an appropriate item, select the generic item.

Example

8760 **Business taxes, licences, and memberships**
 8761 Memberships
 8762 Business taxes
 8763 Franchise fees
 8764 Government fees

If your income statement usually shows an account for "business charges", you could use item 8760 to report this amount.

Reporting an amount that combines two or more items

An amount in your financial statement information may combine two or more GIFI items. To report this amount, determine which item is the greater or greatest amount and choose the most appropriate GIFI item.

Example

Cash and term deposits

If **cash** is the greater amount, report in GIFI item 1001 – Cash.

If **term deposits** is the greater amount, report in GIFI item 1181 – Canadian term deposits.

Example

Rent, taxes, and insurance

You could report this in 8911 – Real estate rental, 8762 – Business taxes, or 8690 – Insurance, depending on which amount is the greatest.

Completing the notes checklist

The notes checklist is included with the GIFI in all CRA approved software packages. Complete the notes checklist when you use the GIFI to report your financial statement information. A copy of the notes checklist is on the next page.

Accounting practitioner information

Choose only one of the three options, whichever applies best to the accounting practitioner who reported on, or prepared the financial statements of the corporation. State whether the accounting practitioner is connected with the corporation by ticking either the *Yes* or *No* box.

Type of involvement

Choose the option that represents the highest level of involvement of the accounting practitioner.

Reservations

If you selected option 1 or 2 under *Type of involvement*, answer question 99, "Has the accounting practitioner expressed a reservation?" by ticking either the Yes or No box.

Other information

If you answer Yes to question 101, you **must** answer questions 102 to 107.

If you answer Yes to question 108, you **must** answer question 109.

Notes Checklist

Part 1—Accounting practitioner information

Choose only one of the following three options, whichever applies to the accounting practitioner:

Chartered accountant 1
Other professional designation 2
No professional designation 3

096

1 _____
2 _____
3 _____

Is the accounting practitioner connected* with the corporation? 097

1 Yes _____ 2 No _____

*A person connected with a corporation can be: (i) a shareholder of the corporation who owns more than 10% of the common shares; (ii) a director, an officer, or an employee of the corporation; or (iii) a person not dealing at arm's length with the corporation.

Part 2 – Type of involvement

Choose the option that represents the highest level of involvement of the accounting practitioner:

Completed an auditor's report 1
Completed a review engagement report 2
Compiled the financial statements along with reviewing the books 3
Conducted a compilation engagement 4

098

1 _____
2 _____
3 _____
4 _____

Part 3 – Reservations

If you selected option "1" or "2" under **Type of involvement** above, answer the following question:

Has the accounting practitioner expressed a reservation? 099

1 Yes _____ 2 No _____

Part 4 – Other information

Were notes to the financial statements prepared? 101

1 Yes _____ 2 No _____

If you answered Yes to the question at line 101, complete lines 102 to 107 below:

Are any values presented at other than cost? 102

1 Yes _____ 2 No _____

Has there been a change in accounting policies since the last return? 103

1 Yes _____ 2 No _____

Are subsequent events mentioned in the notes? 104

1 Yes _____ 2 No _____

Is re-evaluation of asset information mentioned in the notes? 105

1 Yes _____ 2 No _____

Is contingent liability information mentioned in the notes? 106

1 Yes _____ 2 No _____

Is information regarding commitments mentioned in the notes? 107

1 Yes _____ 2 No _____

Does the corporation have investments in joint venture(s) or partnership(s)? 108

1 Yes _____ 2 No _____

If you answered Yes to the question at line 108, complete line 109 below:

Are you filing financial statements of the joint venture(s) or partnership(s)? 109

1 Yes _____ 2 No _____

Notes to the financial statements

You may have prepared notes to the financial statements. If so, include them with the GIFI. If you file electronically,

you must include the notes with your transmission. Your software package should enable you to transfer the notes to the file you are transmitting, without rekeying.

Notes

You cannot include tables and graphs in the notes if you are filing electronically. You must convert this type of information to plain text.

You may choose to report on the GIFI breakdowns of items such as capital assets or investments shown in the notes.

Example

Your balance sheet shows fixed assets of \$31,500, with a breakdown found in the notes.

	Cost	Accumulated amortization	Net
Land	\$ 10,000		\$ 10,000
Buildings	\$ 20,000	\$ 3000	\$ 17,000
Furniture/fixtures	\$ 5,000	\$ 500	\$ 4,500
Total	\$ 35,000	\$ 3500	\$ 31,500

Using the GIFI, you could report the information from the notes as follows:

GIFI Code	Item	Amount
1600	Land	10000
1680	Buildings	20000
1681	Accumulated amortization of buildings	(3000)
1787	Furniture and fixtures	5000
1788	Accumulated amortization of furniture and fixtures	(500)
2008	Total tangible capital assets	35000
2009	Total accumulated amortization of tangible capital assets	(3500)

Example – Using the GIFI

The following example represents a typical set of financial statements.

- Part 1 shows the item and amount reported on the financial statement, and the corresponding GIFI code and name.

■ Part 2 shows just the GIFI codes and amounts representing what we at the CRA receive either electronically or on paper if you use a software package to report your financial statement information.

Note

This example is only a guideline. It is not meant to dictate what to put on your statements or how to file.

Farming Income Statement Information

Cash vs. Accrual

As a farming corporation, you may choose to report your income using the cash method rather than the accrual method. If you are involved in more than one business activity, only your farming business can use the cash method.

0001 Operating name

You should complete this section if your operating name is different from the corporation name (e.g., 111111 Ontario Ltd., operating as Maggie's Muffins).

0002 Description of the operation

You must complete the description of the operation when you are reporting more than one income statement, and the activity is different than the major business activity. For more information on reporting multiple lines of business, refer to page 27 of this guide.

0003 Sequence Number

When you report more than one income statement, you need a sequence number for each statement. The income statement relating to the main activity must have sequence number 01. The supplementary income statements would be numbered consecutively from 02.

Appendix B – Reporting Multiple Lines of Business

Some corporations, such as those involved in a business that receives income from different sources, choose to file a supplementary income statement for each operation. You can use the GIFI to report the information from the supplementary statements.

A corporation may receive rental income from several properties and may choose to complete a supplementary income statement for each of the properties, or a manufacturing corporation may also have a retail outlet and choose to submit a supplementary income statement for the retail activity.

Another situation in which corporations may choose to submit a supplementary income statement is to report amounts broken down in the notes, such as rental loss.

Completing the main and supplementary income statements

- You must provide an operating name for each statement except the summary statement (see the last bullet of this section) unless it is the same as the corporation's legal name.
- You must provide a description of the operation if it is different from the main activity.
- Each statement needs a sequence number. The income statement relating to the main activity must have sequence number 01. The supplementary income statements would be numbered consecutively from 02.
- A GIFI item can be reported on more than one statement. Refer to "Using the same GIFI item on different statements," on this page.
- Each statement should report items up to Item 9970 – Net income/loss before taxes and extraordinary items. Extraordinary items and income taxes (Items 9975 to 9999) should **not** be reported on the main or supplementary income statements.

Note

The main income statement (sequence 01) should not include the net amounts for the information that you have included on the supplementary statements. As a result, some total lines and perhaps gross profit will be different from that which is shown on the corporation's financial statements.

- You must provide a summary statement which reports the following: the sum of all amounts in Item 9970 on each income statement; any amounts reported in Items 9975 to 9995 (representing the extraordinary items and income taxes for the corporation); and the amount in Item 9999 (representing net income/loss after taxes and extraordinary items).

Using the same GIFI item on different statements

You can report the same GIFI items, which appear for the main activity, on your supplementary income statements. However, an amount you report on a supplementary income statement should not be included in the amount you report on the main income statement for the same item.

Example

A corporation that prepares multiple income statements may choose to report Item 8622 – Employer's portion of employee benefits, on each of its statements. The example following this section shows an amount for Item 8622 on each of the statements. Note that the amount reported at Item 8622 on Sequence 01 (main activity), does not include the amounts reported for Item 8622 on the supplementary income statements.

Example – Multiple lines of business

The following example represents the statements of a corporation whose main activity is manufacturing but is also involved in retail and equipment rental.

Part 1 shows the corporation's main income statement, which includes the net amounts for each of the supplementary income statements.

Part 2 shows how to report this type of information using the GIFI. Part 2 also shows how to balance your financial information. Note that we at the CRA would only receive the name, description of operations, and sequence number along with the GIFI code and amount.
